CRITICAL INCIDENT POLICY STATEMENT and Background Information

Introduction

Why do we need a Critical Incident Management Plan?

Handling crises and dealing with difficult 'incidents' on a daily basis is viewed by some as a normal aspect of school life. However, there are occasions when schools will experience incidents of a significantly more extreme nature. What seems to distinguish these incidents is their nature and scale, and it is this type of occurrence, which has come to be termed a '*critical incident*'.

What is a critical incident?

Although the concept of a critical incident is difficult to precisely define we regard it to be an

'unexpected occurrence, which may suddenly have a major impact on school'.

It is also important to note that this approach, which views critical incidents as situations or crises that are beyond the everyday experiences of school life, contains an implied understanding that these incidents would be markedly distressing to a significant number of adults and children.

Preventative and precautionary measures

Whilst no amount of planning can totally prevent accidents and problems occurring, it is hoped that some can be prevented and the effects of others minimised by taking sensible precautionary measures. It is expected that

- all staff and pupils are familiar with the school's routines for fire and the evacuation of the school building on hearing the fire alarm
- all staff are familiar with the routines and procedures for dealing with emergencies
- (as detailed in this Policy)
- all staff and pupils are familiar with the school's security procedures, in particular that all visitors not wearing a visitor's badge should be questioned and escorted to reception.
- all staff organising school trips and visits follow the guidelines and provide the DHT with the relevant information for a risk assessment to be conducted
- all staff are aware of pupils with medical needs or health problems
- all staff are aware of the procedures concerning working alone
- all staff are aware of school policy in dealing with violence at work

- all staff are aware that they should assess associated risks to children before carrying out a curriculum or other activity
- all staff are aware of the Health and Safety Policy
- all staff are aware of the procedures documented in the Staff Handbook.

A major incident may be defined as:

An accident leading to a serious injury or fatality;

- severe injury or severe stress;
- circumstances in which a person or persons might be at serious risk of illness;
- circumstances in which any part, or whole of the school is unable to function as normal due to external influences and
- any situation in which the national press or media might be involved

As such, major incidents include:

- death of a pupil or member of staff
- death or serious injury on a school trip
- epidemic in school or community
- violent incident in school
- a pupil missing from home
- destruction or major vandalism in school
- a hostage taking
- a transport accident involving school members
- a disaster in the community
- a civil disturbance or terrorism
- arson attacks on schools
- major fires at a school
- significant vandalism
- pupil suicides and sudden deaths
- violent attacks on pupils and staff members
- the sudden death, in tragic circumstances of members of staff
- incident involving an intruder, believed to be armed, on school premises
- road traffic accidents, involving fatalities within a school community
- abductions / disappearances
- allegations or actual incidents of abuse against pupils by staff and staff against pupils
- incidents involving the murder of schoolchildren that attracted the attention of national and international media over prolonged periods
- floods
- school used in an emergency

What is a Critical Incident Management Plan?

This Critical Incident Management Plan (CIMP) sets out the procedures to ensure the safety and protection of the whole school community in the event of a critical incident.

SCHOOL CRITICAL INCIDENT MANAGEMENT PLAN
PROTOCOL IN THE EVENT OF A DEATH OR
ACCIDENT ON SITE (C)

FATAL INCIDENT PROCEDURE

1. Clear the immediate area of all children.
2. Stay with the body
3. Alert another adult to call the emergency services immediately and then alert the Head Teacher to initiate the **Critical Incident Management Plan**.
4. If there is the slightest possibility of the presence of life, resuscitation is to be attempted.
5. Encourage other adults to take appropriate care of the remaining people.
6. The Headteacher is to inform the next of kin.
7. If individuals need counselling, this is to be arranged through their registered GP.
8. The **Critical Incident Team** is to liaise with the Coroner's Office with a special reference to the removal of the remains and any necessary forensic or other medical examination.
9. The immediate environs should not be disturbed without the authority of the Coroner.

ACCIDENT PROCEDURE

When any member of staff is called to assist at an accident where they suspect that there might be a fracture of a bone or there is gushing blood:

1. **DO NOT MOVE THE PERSON.** (Only move the person, if he/she is not safe where they are.)
2. Send another person (a sensible child or another member of the staff) to contact the Headteacher.
3. Keep the person in as comfortable, warm and still a position as the injury allows, supporting the affected limb.
4. If there is gushing blood use something (maybe an article of clothing) to put pressure on the wound.

Taking the above actions may prevent further damage to both the person and yourself; for example: if the child faints on stone, you could easily damage your back whilst stopping the child from falling.
